

Ladies and Gentlemen of the Commission;

I am an Amateur Radio Operator and holder of an Amateur Extra Class License, W4FAL. I also hold a commercial General Radiotelephone Operators License (GROL).

I urge you to grant RM-9404. I believe there is much to be learned from experimentation in the low frequency bands below 200 kHz. This has already been demonstrated with experimentation under Part 15 of the Commission's Rules.

Thank you for your consideration.

Frank A. Lynch, W4FAL
